Industry Award 2015: First Sensor AG has been awarded the predicate BEST OF

- LDE differential pressure sensor awarded at the Hanover Fair

Berlin, April 13, 2015 – As part of the Industry Award 2015, First Sensor AG has been awarded the predicate BEST OF. The jury was particularly impressed by First Sensor's LDE differential pressure sensor, and thus the international sensor company belongs to the top group of the submitted applications. The prize for industry awarded by the "Initiative Mittelstand" rewards companies that provide a significant technological, economic, social, and ecological benefit. The expert jury honours the winning companies with the title BEST OF 2015.

The LDE differential low pressure sensors are based on thermal flow measurement of gas through a micro-flow channel integrated within the sensor chip. The innovative LDE technology features superior sensitivity especially for ultra low pressures. Typical applications include medical devices, HVAC and instrumentation.

About First Sensor

First Sensor is a leading supplier of sensor solutions in the Medical, Industrial, Mobility, and Electronic Engineering & Manufacturing Services (E2MS) fields. First Sensor develops and manufactures high-quality, customer-specific sensor solutions for the detection of light, radiation, pressure, flow, level and acceleration. The company produces in-house and along the value-added chain from component to system level. First Sensor was founded over 20 years ago in Berlin and is listed on the Frankfurt Stock Exchange since 1999 [Prime Standard | WKN: 720190 | ISIN: DE0007201907 | SIS].
